JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

and effects disinfected by steam ; dead buried at sea ; baggage destroyed ; crew and passengers mustered and temperature taken at 4 p. m. ; all well.

McKAY.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

[Telegram.]

Smallpox on schooner Hugh Kelly at Savannah, Ga.

SAVANNAH, GA., June 16, 1901.

Schooner *Hugh Kelly*, ten days from New York, 1 case smallpox on board. Vessel and crew of 8 sent to Savannah quarantine for disinfection.

HOBODY.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Smallpox at Savannah Quarantine, Savannah, Ga.

SAVANNAH QUARANTINE, SAVANNAH, GA., June 20, 1901.

SIR: Confirming my telegram of the 17th instant, I have the honor to report the arrival at this station of the American schooner *Hugh Kelly* with a case of smallpox aboard. The vessel was from Savannah (previous port, New York), and was sent here by Asst. Surg. W. C. Hobdy. Immediately after arrival all hands were vaccinated. Early the next day the case was removed to the camp at the old quarantine station and the vessel brought to the wharf for disinfection. The schooner has been thoroughly disinfected, special attention being paid to the galley, pantry, cook's room, stores, tableware, and cooking utensils, as the cook is the one affected with the disease. The *Hugh Kelly* arrived in Savannah on the afternoon of the 14th, and both the captain and cook informed me that the disease did not develop until the next morning ; but, considering the history, the patient presented a remarkably well-developed vesicular eruption on the afternoon of the 16th. As all of the crew but the first mate fail to show vaccination marks which can be considered protective, it is considered advisable to detain them the regulation period for observation. The patient is doing well at present.

Respectfully,

WM. J. LINLEY,
Acting Assistant Surgeon, U. S. M. H. S.

Smallpox at Evansville, Ind.

EVANSVILLE, IND., June 22, 1901.

SIR: I have the honor to report 1 case of smallpox in the pesthouse in this city.

Respectfully,

B. W. BROWN,
Passed Assistant Surgeon, U. S. M. H. S.

Smallpox in Maine.

AUGUSTA, ME., June 20, 1901.

SIR: Since my notification under date of May 29, of 1 case of smallpox in Milo and 1 in Dexter, the number of infected places in this State,
